DATASHEET

The Automated SOC

Use Cribl with SOCAutomation to provide an
Automated SOC solution - Automatic Managed Detection and Response

01 Universal Ingest

Ingest data from any source – no parsers required. Format-agnostic architecture eliminates the need to write or maintain customer parsers.

02 Multi-Layer Agentic AI

Combines AI, machine learning, and statistical methods and security-centric algorithms , which maximises insight, resilience and relevance.

03 Reasoned Automation

CyberFlow™ Next Gen SOAR orchestrates routing workflows. Reduce Time-To-Resolution and free up security resources.

KEY BENEFITS

✓ **Parser-less Design**
Any data. Any source. Never write another parser. Ever.

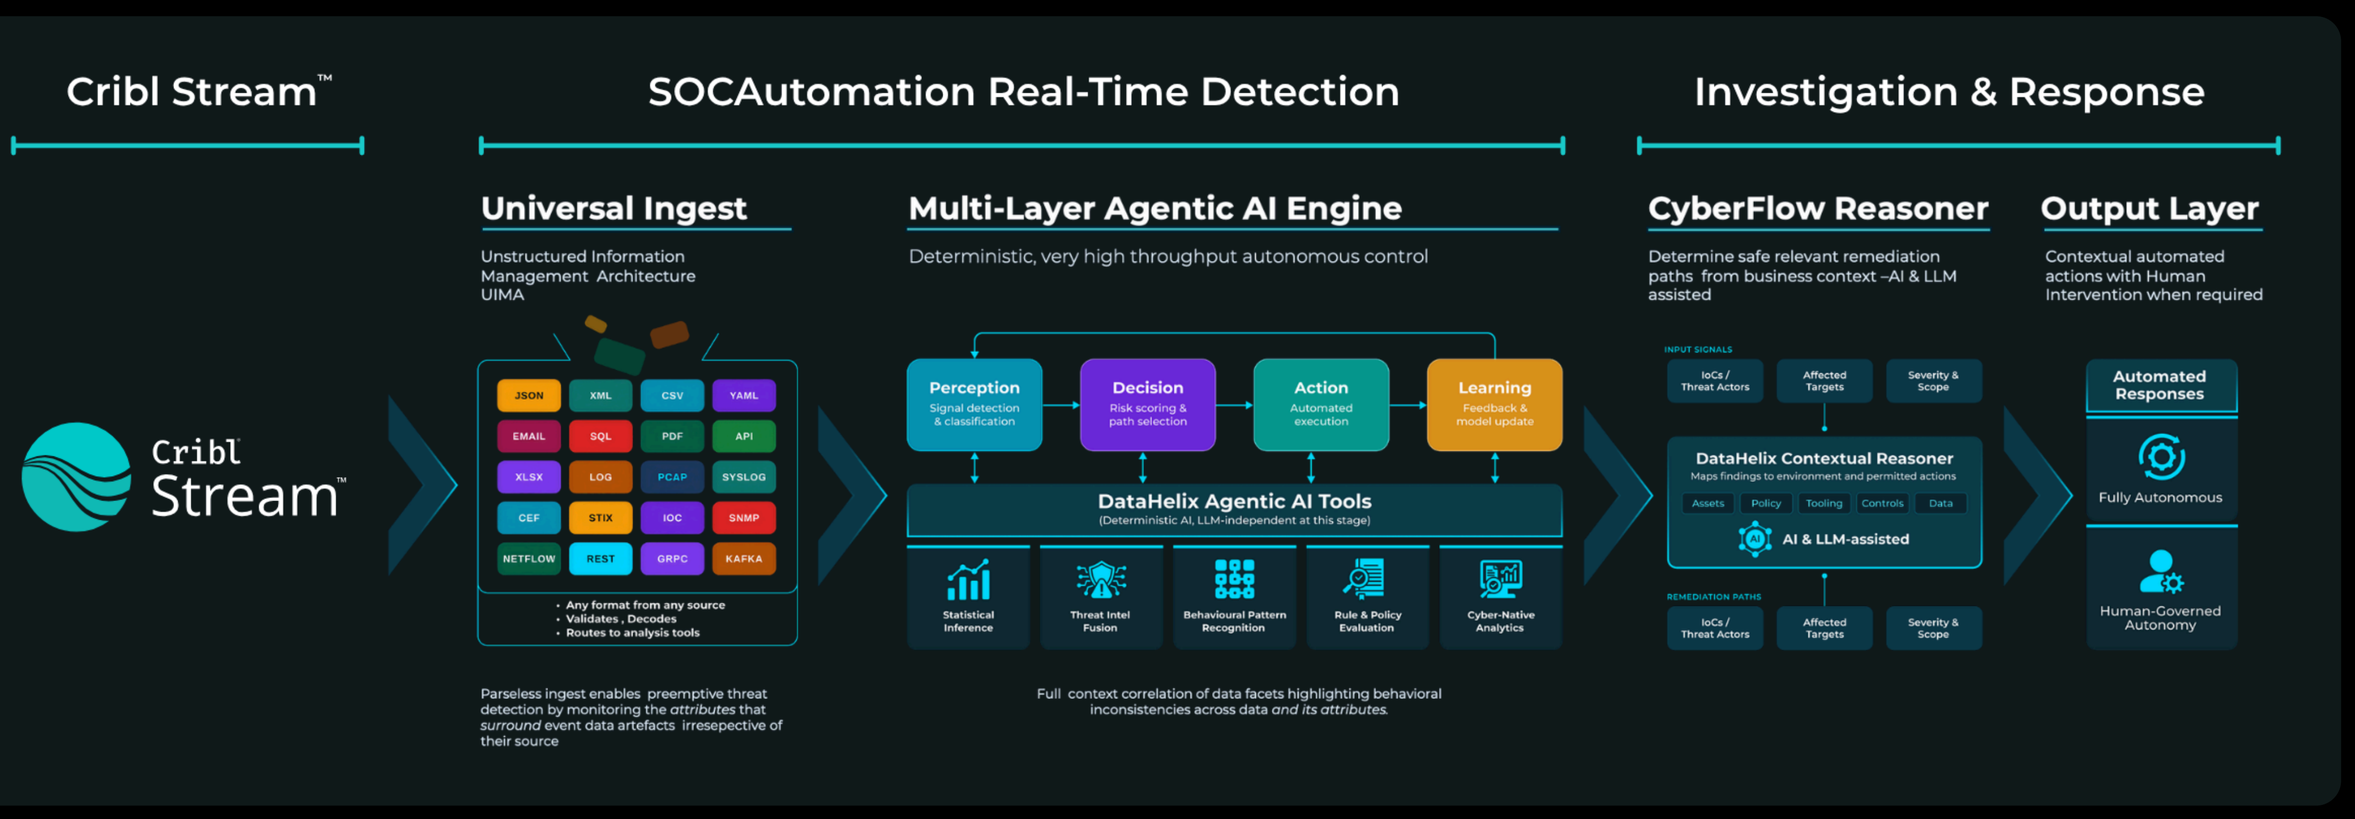

✓ **End-to-End Coverage**
Complete attack lifecycle coverage – ingest to remediation.

✓ **Precision AI**
AI leveraged with surgical precision – when and where useful.

✓ **Maximise ROI**
Free up resources for high-value defence.

✓ **Transparent Automation**
Human-in-the-loop automation – transparency built in.

PLATFORM OVERVIEW

SOCAUTOMATION
Cyber AI automation
for modern digital enterprises
